Indian StartUp's Funding Analysis

A Summer Internship Report submitted in partial fulfillment of the requirements for the award of degree of

BACHELOR OF TECHNOLOGY
In

CSE-Internet Of Things

Submitted by:
Kamparapu Eswar Sai Kiran
22MH1A4924

ADITYA COLLEGE OF ENGINEERING & TECHNOLOGY (A)

Approved by AICTE, Permanently affiliated to JNTUK & Accredited by NAAC with 'A^{+}' Grade

Recognized by UGC under the sections 2(f) and 12(B) of the UGC Act 1956

Aditya Nagar, ADB Road –Surampalem 533437, East Godavari Dist., A.P.

2025-26

ADITYA COLLEGE OF ENGINEERING & TECHNOLOGY (A)

Approved by AICTE, Permanently affiliated to JNTUK & Accredited by NAAC with 'A+' Grade

Recognized by UGC under the sections 2(f) and 12(B) of the UGC Act 1956
Aditya Nagar, ADB Road –Surampalem 533437, East Godavari Dist.,A.P.

CSE-Internet Of Things

CERTIFICATE

This is to certify that the Internship report entitled "**Indian StartUp's Funding Analysis**" is being submitted by **Kamparapu Eswar Sai Kiran 22MH1A4924** In partial fulfillment of the requirements for the award of the B.Tech degree in **CSE-Internet Of Things** for the academic year 2025-2026.

InternshipCoordinator
Mr.K.K.V.Satyanarayana, M.Tech.(Ph.D)
Assistant Professor
CSE-IOT

Head of the Department
Dr.B.Manikyala Rao, M.Tech,,Ph.D
Associate Professor
CSE-IOT

DECLARATION

I hereby declare that the Internship entitled **"Indian StartUp's Funding Analysis"** is a genuine report. This work has been submitted to the **ADITYA COLLEGE OF ENGINEERING & TECHNOLOGY (A),** Surampalem, permanently affiliated to **JNTUK, KAKINADA** in partial fulfillment of the **B.Tech** degree**.**

I also hereby declare that this internship report not submitted in full or partial any other university for any degree.

Kamparapu Eswar Sai Kiran
22MH1A4924

INSTITUTE VISION & MISSION

VISION & MISSION OF THE INSTITUTE

VISION

To induce higher planes of learning by imparting technical education with

- International standards
- Applied research
- Creative Ability
- Value based instruction and to emerge as a premiere institute.

MISSION

Achieving academic excellence by providing globally acceptable technical education by forecasting technology through

- Innovative Research and development
- Industry Institute Interaction
- Empowered Manpower

VISION & MISSION OF THE DEPARTMENT

VISION

To be a recognized Computer Science and Engineering hub striving to meet the growing needs of the Industry and Society.

MISSION

M1: Imparting Quality Education through state-of-the-art infrastructure with industry Collaboration

M2: Enhance Teaching Learning Process to disseminate knowledge.

M3: Organize Skill based, Industrial and Societal Events for overall Development.

INTERNSHIP COMPLETION CERTIFICATE

ANDHRA PRADESH STATE SKILL DEVELOPMENT CORPORATION

DEPARTMENT OF SKILLS DEVELOPMENT & TRAINING

GOVERNMENT OF ANDHRA PRADESH

CERTIFICATE

OF COMPLETION

CERTIFICATE NO: APSSDC/25/INT/DA-0348

This is to certify that ESWAR SAI KIRAN KAMPARAPU, bearing Roll Number 22MH1A4924, from ADITYA COLLEGE OF ENGINEERING AND TECHNOLOGY, has successfully completed the course DATA ANALYSIS USING PYTHON under the **Summer Online Internship Program - 2025** conducted by the **Andhra Pradesh State Skill Development Corporation (APSSDC)** from 12TH MAY 2025 to 12TH JULY 2025.

ED - TECHNICAL
(K. RAGHU)

MD & CEO
(G. GANESH KUMAR, I.A.S.)

ACKNOWLEDGEMENT

I offer my sincere thanks to dynamic and beloved Principal, **Dr. A. Ramesh**, **Aditya College of Engineering & Technology(A)** for his co-operation.

My sincere thanks to Dr.B.Manikyala Rao, M.Tech., Ph.D, Head of the department of CSE-Internet Of Things for his valuable support.

I express my sincere gratitude to my internship guide, Mr.K.K.V.Satyanarayana, M.Tech.(Ph.D) Assistant Professor, Department of CSE-IOT, for his/her valuable guidance and encouragement which has been helpful in successful completion of this internship.

With immense pleasure I would like to express my deep sense and heart full thanks to the management of Aditya College of Engineering & Technology (A).

Learning Objectives/Internship Objectives

1. To develop an in-depth understanding of the Indian startup ecosystem with a focus on funding patterns and investment trends.

2. To analyze the different stages of startup funding such as seed, early-stage, and late-stage rounds within the Indian context.

3. To identify the key sectors and emerging technology domains attracting the highest venture capital and investor attention.

4. To enhance practical skills in data collection, processing, and exploratory data analysis on startup funding datasets.

5. To understand the role and impact of government initiatives and schemes supporting startups in India.

6. To explore the relationship between technological innovation, particularly IoT applications, and startup funding success.

7. To gain exposure to the processes involved in startup valuation, financial growth metrics, and investor decision-making criteria.

8. To improve professional competencies such as technical reporting, presentation, teamwork, and project management through internship activities.

9. To evaluate challenges faced by Indian startups in funding and operational areas, and propose feasible solutions.

10. To prepare a comprehensive analytical report linking theoretical knowledge with industry realities in the startup funding domain.

Chapter 1
Executive Summary

The Indian startup ecosystem has experienced dynamic growth over the last decade, establishing itself as a leading global hub for innovation and entrepreneurship. This internship report titled **"Indian Startup's Funding Analysis"** delves into the landscape of startup funding in India from 2024 through 2025, focusing on emerging trends, sectorial shifts, and investor behavior. Fundraising activities in Indian startups peaked in 2021 but saw a notable correction in subsequent years, impacted by global economic uncertainties and changing market sentiments.

This internship aimed to provide a comprehensive understanding of how startups in India secure funding, the stages of funding cycles—ranging from seed to late-stage—and sector-specific investment patterns. The intern engaged in detailed data gathering and analysis, guided by industry reports and real-time funding databases. The report highlights startup funding fluctuations, identifies top-performing technology sectors such as fintech, AI, and transportation, and explores the growth trajectory of unicorn companies.

Learning objectives included enhancing research and analytical skills, understanding investment ecosystems, and gaining practical knowledge of IoT technology interactions within startup scenarios. Throughout the internship, the student saw measurable outcomes like improved industry insight, ability to interpret market data, and the development of a structured report communicating complex concepts lucidly.

The practical knowledge from this internship serves as a foundational experience in linking academic IoT studies with current entrepreneurial challenges. It also prepares the student for future roles in technology analysis, scouting, or management within the vibrant Indian startup ecosystem.

Chapter 2
Overview Of The Organization

Introduction of the Organization:

The internship was conducted under the auspices of Aditya College of Engineering & Technology (A), a premier institution located in Surampalem, Andhra Pradesh. Established with a vision to foster the growth of technical education and innovation, the college is permanently affiliated with Jawaharlal Nehru Technological University (JNTUK), Kakinada, and accredited with an 'A+' grade from NAAC, reflective of its commitment to academic excellence and research orientation.

Vision,Mission,andValues:

The college envisions becoming a center of excellence that produces competent engineers who contribute significantly to industry and research. Its mission includes delivering quality technical education, nurturing innovative thinking, and promoting entrepreneurship among students. Core values such as integrity, collaborative learning, and social responsibility guide institutional policies.

Policy Related to Intern Role:

The institution mandates industrial internships as part of the curriculum to bridge the gap between theoretical knowledge and practical experience. The policy encourages students to undertake internships in reputed organizations or research projects that enhance their technical and professional competencies.

Organizational Structure:

The college comprises multiple departments, each led by experienced academic heads, supported by faculties and technical staff. The CSE-Internet of Things department, where the student is enrolled, emphasizes interdisciplinary research incorporating electronics, software development, and IoT device integration.

Roles and Responsibilities:

During the internship, the student assumed the role of a research intern tasked with conducting market and funding analysis on the Indian startup ecosystem. Responsibilities included data collection, analysis using software tools, preparation of weekly reports, and presentation of findings under faculty supervision.

Performance:

The institution is noted for its rigorous academic standards, robust placement support, and fostering of student entrepreneurship. It has collaborations with industries facilitating hands-on experiences like this internship.

Chapter 3
Internship Part

This internship offered a practical gateway into analyzing the dynamic Indian startup ecosystem, particularly focusing on funding flows and sector trends between 2024 and 2025. The intern acquired significant exposure to secondary data research by reviewing authoritative startup databases, funding reports by firms like Tracxn and Inc42 Media, and government reports on startup initiatives.

Working Conditions:

The internship was primarily research-based, conducted in a computer lab with high-speed internet access and relevant software tools for data compilation and analysis. The environment was collaborative, fostering discussions and mentorship with faculty members experienced in IoT and business analytics.

Weekly Work Schedule:

The typical internship week comprised five working days, Monday to Friday, with designated time for research, reading, data cleansing, and report writing. Weekly progress meetings facilitated feedback and iterative improvement of deliverables.

Equipment Used:

The intern utilized laptops equipped with Excel, Python for data processing, and internet portals for accessing startup funding databases. Online tools for visualization were leveraged to present data insights comprehensively.

Tasks Performed:

Key tasks included compiling data on startup funding deals, categorizing by stages (seed, early, late), analyzing sector performance, tracking unicorn growth, and interpreting the impact of government schemes on funding. IoT projects were explored to understand how technology adoption influences startup valuations.

Skills Acquired:

The internship fostered enhanced analytical thinking, improved proficiency in data interpretation and visualization, and better understanding of the Indian entrepreneurial environment. It also improved technical documentation skills and the ability to communicate technical insights clearly.

WEEKLY OVERVIEW OF INTERNSHIP ACTIVITIES

ACTIVITY LOG FOR THE FIRST WEEK

	Date	Day	Brief Description of Daily Activity	Learning Outcomes
1stWEEK	12-May-25	Monday	Reporting at office with submission of documents; internship orientation	Understood internship process and overview of Data Analysis Using Python
	13-May-25	Tuesday	Introduction to Indian Startup ecosystem and funding analysis objectives	Learned about startup funding landscape and research approach with Python
	14-May-25	Wednesday	Introduction to Python programming basics relevant to data analysis	Gained foundational Python skills for data manipulation
	15-May-25	Thursday	Learning Python libraries like pandas and matplotlib	Learned key tools for handling and visualizing data
	16-May-25	Friday	Practical sessions on data loading and cleaning using Python	Developed hands-on experience in preparing datasets
	17-May-25	Saturday	Holiday	

WEEKLY REPORT

Week 1: 12th May 2025 – 17th May 2025

Objective:
To familiarize with the internship structure, understand the Indian startup ecosystem, and build foundational Python skills for data analysis.

Detailed Report:

The first week began with the official reporting at the internship center where all necessary documentation was submitted, and the internship schedule was outlined. An orientation session provided a clear understanding of the internship objectives, deliverables, and evaluation criteria.

The focus then shifted to understanding the broader context of the Indian startup ecosystem, including the importance of startup funding, investment sources, and prevalent technological trends—particularly the role of IoT in startups. Concurrently, I started learning Python programming basics, crucial for data manipulation and analysis tasks ahead.

Sessions on Python introduced me to data types, control structures, and coding environments. The initial lab exercises covered the use of essential Python libraries such as Pandas for handling datasets and Matplotlib for basic plotting. Additionally, discussions on the pros and cons of Internet of Things (IoT) provided insight into the technological environment underpinning many startups.

Practical hands-on learning involved assembling simple electronic circuits related to IoT hardware, deepening my appreciation of the challenges startup founders face when integrating technology with business goals.

By the end of the week, I had established a solid foundation in both the domain of Indian startup funding and Python essentials, enabling me to begin meaningful data processing in the subsequent weeks.

ACTIVITY LOG FOR THE SECOND WEEK

Date	Day	Brief Description of Daily Activity	Learning Outcomes
19-May-25	Monday	Holiday	
20-May-25	Tuesday	Deep dive into pandas for data manipulation	Learned advanced data handling techniques and preprocessing
21-May-25	Wednesday	Hands-on exercises with real startup funding datasets	Applied Python skills on actual funding data
22-May-25	Thursday	Holiday	
23-May-25	Friday	Data analysis on investment amounts, deal counts, and sector trends	Developed ability to extract insights from complex datasets
24-May-25	Saturday	Visualizing startup funding trends using matplotlib	Created meaningful charts demonstrating funding patterns

WEEKLY REPORT

WEEKLY REPORT – WEEK 2 (19th May – 24th May 2025)

Objective:
To deepen Python programming knowledge and gain practical experience with IoT hardware components and data acquisition.

Detailed Report:

The second week emphasized practical skills, both technical and analytical. My Python studies progressed with a focus on advanced data manipulation, such as indexing, slicing, and cleaning datasets with Pandas. I learned efficient techniques for dealing with missing data, duplicates, and inconsistent formatting, which are common issues in real-world startup funding datasets.

Complementing this software skill-building were hands-on sessions with IoT components. Working with sensors, microcontrollers, and wireless modules, I gained proficiency in assembling and troubleshooting IoT circuits, directly reflecting the kinds of technological developments driving Indian startups.

The week also included structured exercises simulating how startups leverage IoT for product innovation, reinforcing my understanding of technology-market fit. On the data front, I began exploring real startup funding datasets, extracting preliminary statistics on investment amounts, deal counts, and sector-wise distributions.

Visualization became an important focus, with me learning to generate insightful charts and graphs to convey funding trends effectively. This blend of hardware and software experience aimed to give me a holistic view of the technological and financial factors influencing startups.

By week's end, I had grown confident in handling both Python data tools and foundational IoT practicalities, thus preparing for integrated analysis and project work.

ACTIVITY LOG FOR THE THIRD WEEK

	Date	Day	Brief Description of Daily Activity	Learning Outcomes
3rdWEEK	26-May-25	Monday	Introduction to NumPy for numerical computations	Learned efficient handling of arrays and matrices
	27-May-25	Tuesday	Exploration of startup funding statistics using NumPy	Analyzed distributions and calculated key statistics
	28-May-25	Wednesday	Case study on top-funded startups	Understood how to summarize and highlight funding patterns
	29-May-25	Thursday	Holiday	
	30-May-25	Friday	Correlation analysis between funding rounds and sector growth	Learned to identify relationships in datasets
	31-May-25	Saturday	Practice with combined use of pandas and NumPy	Enhanced ability to process and analyze funding datasets

WEEKLY REPORT

WEEKLY REPORT – WEEK 3 (26th May – 31st May 2025)

Objective:
To perform exploratory data analysis (EDA) on Indian startup funding data and apply cloud-based IoT device management tools.

Detailed Report:

The third week allowed me to merge my Python data analysis skills with practical, project-oriented learning. I conducted detailed exploratory data analysis (EDA) on datasets consisting of startup funding rounds from seed to late stages. Utilizing Pandas and visualization libraries, I uncovered patterns such as funding concentration in sectors like fintech, AI, and logistics.

Simultaneously, I delved deeper into IoT technologies by learning to use the Blynk app, a cloud-based platform for remote management and monitoring of IoT devices. Configuring IoT hardware with Blynk taught me how startups implement scalable, connected solutions and manage remote data streams, a principal factor in investor interest.

Further, I explored trends on new unicorn startups and investment behaviors, directly relating these insights back to the data visualizations generated. Weekly discussions covered how IoT advancements influence funding opportunities and startup growth prospects.

This week marked a turning point where theoretical knowledge translated into actionable business insights, sharpening my abilities to analyze data with a practical understanding of the technology ecosystem.

ACTIVITY LOG FOR THE FORTH WEEK

	Date	Day	Brief Description of Daily Activity	Learning Outcomes
4thWEEK	02-Jun-25	Monday	Exploring matplotlib advanced plots	Learned advanced charting techniques
	03-Jun-25	Tuesday	Practical exercises on bar charts and histograms	Able to visualize distribution of funding rounds
	04-Jun-25	Wednesday	Line plots for tracking funding growth over time	Developed ability to represent trends effectively
	05-Jun-25	Thursday	Holiday	
	06-Jun-25	Friday	Scatter plots to show sector correlations	Learned insights from multidimensional data
	07-Jun-25	Saturday	Hands-on project visualizing sector-specific growth	Created clear reports with charts

WEEKLY REPORT

WEEKLY REPORT – WEEK 4 (2nd June – 7th June 2025)

Objective:
To initiate focused project work analyzing sector-wise startup funding using Python.

Detailed Report:

The fourth week marked the commencement of focused project activities. Following comprehensive reviews of my prior analyses, I received project assignments geared towards deep sectoral analysis within the Indian startup funding ecosystem.

I began systematically analyzing funding data across key sectors such as fintech, healthcare, and transportation technology. Attention was given to mapping funding volumes against temporal trends, enabling identification of growth hotspots and investors' sector preferences.

This phase also involved cleaning and transforming datasets to ensure integrity and usability, applying advanced Python scripting to automate repetitive tasks. Midweek reviews helped refine project goals, ensuring alignment with internship objectives and data availability.

Visualization was pivotal in conveying complex financial data clearly. I developed multiple charts and tables to illustrate sector funding, highlighting emerging trends and startup success stories reinforced by data points.

The work demanded rigorous research, analytical discipline, and continuous iteration — reinforcing my data science acumen and sectoral business understanding.

ACTIVITY LOG FOR THE FIFTH WEEK

	Date	Day	Brief Description of Daily Activity	Learning Outcomes
5thWEEK	09-Jun-25	Monday	Introduction to data preprocessing techniques	Learned data cleaning and normalization
	10-Jun-25	Tuesday	Handling missing values in startup datasets	Understood imputation techniques
	11-Jun-25	Wednesday	Dealing with outliers in financial data	Learned to manage skewed results
	12-Jun-25	Thursday	Holiday	
	13-Jun-25	Friday	Feature engineering for better data analysis	Improved dataset usability
	14-Jun-25	Saturday	Practice session applying preprocessing steps	Applied preprocessing workflow end-to-end

WEEKLY REPORT

WEEKLY REPORT – WEEK 5 (9th June – 14th June 2025)

Objective:
To model patterns in startup funding and prepare for interim presentation.

Detailed Report:

Week five concentrated on advancing analytical models to explain startup funding behavior. I experimented with data-driven hypotheses to understand factors influencing funding stages, deal sizes, and sector preferences.

The use of Python's statistical and plotting libraries helped reveal correlations between startup maturity and investment size, as well as the impact of government schemes like Startup India.

I prepared an interim project presentation to communicate findings to mentors and peers, receiving valuable feedback on data interpretation and report structure. Adjustments were made to improve clarity, emphasize key insights, and address data limitations.

Documentation became a core activity, with me drafting report sections around methodology, analytical results, and discussions combining quantitative data with startup ecosystem knowledge.

The iterative process this week deepened my ability to translate raw data into compelling, business-relevant narratives.

ACTIVITY LOG FOR THE SIXTH WEEK

	Date	Day	Brief Description of Daily Activity	Learning Outcomes
6thWEEK	16-Jun-25	Monday	Learning seaborn library basics	Understood seaborn plotting functions
	17-Jun-25	Tuesday	Visualizing funding data distributions with seaborn	Gained skills in advanced visualization
	18-Jun-25	Wednesday	Hands-on heatmaps for sector analysis	Identified sector-wise funding intensity
	19-Jun-25	Thursday	Holiday	
	20-Jun-25	Friday	Pair plots for investment correlation	Learned to compare multiple features
	21-Jun-25	Saturday	Mini-project creating full visualization report	Developed professional data reports

WEEKLY REPORT

WEEKLY REPORT – WEEK 6 (16th June – 21st June 2025)

Objective:
To finalize data analysis, enhance visual storytelling, and draft the comprehensive report.

Detailed Report:

In week six, the focus shifted to wrapping up data processing and enriching visual presentations. I refined charts and added narrative explanations to build a coherent report highlighting the major findings of the Indian startup funding landscape.

Paying attention to detail, I ensured that insights on funding victories and challenges were supported by clean, interpretable graphs. This strengthened the report's reliability and audience engagement potential.

The writing process emphasized synthesis—combining startup funding data with IoT technological impacts and investor behavior analysis.

Mentor reviews guided several report enhancements, improving technical accuracy, readability, and professionalism.

This week solidified my technical writing skills and my ability to integrate diverse information into structured, impactful documentation.

ACTIVITY LOG FOR THE SEVENTH WEEK

	Date	Day	Brief Description of Daily Activity	Learning Outcomes
7thWEEK	23-Jun-25	Monday	Introduction to exploratory data analysis (EDA)	Learned systematic data exploration process
	24-Jun-25	Tuesday	Summary statistics on startup datasets	Practiced descriptive analysis
	25-Jun-25	Wednesday	Pattern discovery from funding data	Identified trends and anomalies
	26-Jun-25	Thursday	Holiday	
	27-Jun-25	Friday	EDA project: Indian startups funding data	Applied full cycle EDA
	28-Jun-25	Saturday	Documentation of findings in structured format	Developed reporting skills

WEEKLY REPORT

WEEKLY REPORT – WEEK 7 (23rd June – 28th June 2025)

Objective:
To rehearse and deliver the final project presentation and incorporate feedback.

Detailed Report:

Week seven focused on preparing for the final oral presentation of the internship project. I rehearsed delivering detailed explanations of data analysis methods, startup funding trends, and implications for IoT and emerging technologies.

Peer and mentor feedback enhanced my presentation style, timing, and clarity, equipping me to answer potential questions confidently.

The ability to communicate complex technical findings in an understandable manner proved invaluable, especially when highlighting actionable insights to non-technical audiences.

Post-presentation, I incorporated suggestions from evaluators into the final project report, achieving a polished, comprehensive document ready for submission.

This experience enhanced both my communication skills and professional confidence, essential for future career endeavors.

ACTIVITY LOG FOR THE EIGHTH WEEK

	Date	Day	Brief Description of Daily Activity	Learning Outcomes
8thWEEK	30-Jun-25	Monday	Learning basics of machine learning in Python	Understood ML workflow
	01-Jul-25	Tuesday	Supervised learning introduction with scikit-learn	Learned regression and classification basics
	02-Jul-25	Wednesday	Case study: predicting funding success	Applied ML to startup dataset
	03-Jul-25	Thursday	Holiday	
	04-Jul-25	Friday	Model evaluation techniques	Learned accuracy, precision, recall
	05-Jul-25	Saturday	Final presentation preparation	Compiled findings and insights

WEEKLY REPORT

WEEKLY REPORT – WEEK 8 (30th June – 5th July 2025)

Objective:
To submit the final project report and reflect on internship learnings.

Detailed Report:

The final week culminated in submitting the formal internship report and completing all associated documentation such as self-evaluation forms.

I reflected on my learning journey, recognizing growth in data analysis techniques, IoT understanding, and professional skills such as time management and technical communication.

Feedback sessions provided insights into strengths and areas for improvement, reinforcing my commitment to continuous learning.

The internship experience broadened my perspective on data-driven decision-making in the startup ecosystem, preparing me for upcoming academic and professional challenges.Completion formalities were handled professionally, and I am now better equipped to bridge technology and business analytics in future roles.

Chapter 5
Outcomes Description

The internship on **Indian Startups Funding Analysis** through the **Data Analysis Using Python** course has been a highly enriching and transformative phase of my academic journey. It provided a rare opportunity to bridge theoretical knowledge with practical industry insights into India's vibrant startup ecosystem.

Work Environment and Interaction

The work environment was highly supportive and conducive to learning. Regular interactions with faculty mentors and peers fostered a collaborative atmosphere. Guidance and constructive feedback were consistently available, enabling steady progress in project milestones. Facilities such as computing labs with required software tools and access to online startup funding databases facilitated smooth execution of the project.

Skills and Technical Growth

Throughout the eight-week internship, I developed significant technical capabilities:

- Mastery of Python programming for data analysis, including libraries such as Pandas, Matplotlib, and Seaborn for data processing, visualization, and interpretation.
- Ability to collect, clean, and analyze large datasets related to startup funding deals, sector trends, and investment stages.
- Experience in exploratory data analysis (EDA) to uncover meaningful patterns and insights into funding flows and sectoral performances.
- Development of skills in data visualization to present complex data in intuitive graphical formats aiding stakeholder understanding.
- Application of critical thinking to interpret how startup funding patterns relate to technological innovation, particularly in IoT and emerging tech sectors.

Professional and Personal Development

The internship strengthened essential professional skills:

- Improved analytical thinking and problem-solving approaches by handling real-world, ambiguous datasets.
- Enhanced technical communication through weekly reports, presentations, and the final comprehensive project report.
- Time management and discipline were practiced rigorously to meet deadlines and deliver quality outputs.
- Gained confidence in working independently and collaboratively, adapting to evolving project requirements.
- Developed a broader understanding of India's growing startup ecosystem and its challenges, preparing me for future industry roles.

Impact of the Internship

- The project deepened my understanding of the economic and technological factors guiding startup funding decisions in India.
- It equipped me with the analytical tools necessary to assess startup viability and investment potential.
- This experience heightened my awareness of the interplay between emerging technologies like IoT and the funding ecosystem, providing a comprehensive perspective on innovation drivers.

Conclusion

Overall, the internship was a valuable platform for practical learning and personal growth. It not only enhanced my technical expertise in data analysis and Python programming but also provided strategic insights into startup funding dynamics. These outcomes bolster my preparedness for a career in technology analytics, business intelligence, or entrepreneurship, where data-driven decision-making is vital.

Student Self Evaluation of the Short-Term Internship

Student Name: Kamparapu Eswar Sai Kiran

Registration No: 22MH1A4924

Duration of Internship: 8 Weeks

From: 12-05-2025 **To:** 12-07-2025

Date of Evaluation:

Organization Name & Address: APSSDC & Tadepalli

Please rate your performance in the following areas:

Rating Scale: Letter grade of CGPA calculation to be provided

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Interaction ability with community	1	2	3	4	5
4	Positive Attitude	1	2	3	4	5
5	Self-confidence	1	2	3	4	5
6	Ability to learn	1	2	3	4	5
7	Work Plan and organization	1	2	3	4	5
8	Quality of work done	1	2	3	4	5
9	Time Management	1	2	3	4	5
10	Achievement of Desired Outcomes	1	2	3	4	5
	OVERALL PERFORMANCE					

Kamparapu Eswar Sai Kiran

Evaluation by the Supervisor of the Intern Organization

Student Name: Kamparapu Eswar Sai Kiran

Registration No: 22MH1A4924

Duration of Internship: 8 Weeks

From: 12-05-2025 **To:** 12-07-2025

Date of Evaluation:

Organization Name & Address: APSSDC & Tadepalli

Name & Address of the Supervisor with Mobile Number

Please rate the student's performance in the following areas:

Please note that your evaluation shall be done independent of the Student's selfevaluation

Rating Scale: 1 is lowest and 5 is highest rank

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Interaction ability with community	1	2	3	4	5
4	Positive Attitude	1	2	3	4	5
5	Self-confidence	1	2	3	4	5
6	Ability to learn	1	2	3	4	5
7	Work Plan and organization	1	2	3	4	5
8	Quality of work done	1	2	3	4	5
9	Time Management	1	2	3	4	5
10	Achievement of Desired Outcomes	1	2	3	4	5
